Portafolio

ABOUT ME

I'm Janky, and a proactive and adaptable professional with a great learning ability. I stand out for my quick acquisition of new skills, my focus on continuous growth, and my ability to confidently face challenges. I integrate easily into different environments and contribute solutions with initiative and commitment.

EDUCATION

University "Santiago marino"

20221- 2025

Systems engineering

Miguel otero Silva

2016 - 2021

Hight school

- Average: 8.40
- Honorary title

PROFESSIONAL AND PERSONAL SKILLS.

- Proactive
- leadership
- Responsibilities
- Excellent people skills
- Positive attitude
- Teamwork IT
- Equipment maintenance
- Basic office management
- Good communication
- Advanced Python

PROFESSIONAL EXPERIENCE

Bakery "La nueva Real"

2021 - 2024

cashier

- Manage cash and credit/debit card financial transactions.
- Provide customer service with an emphasis on satisfaction and problem resolution.
- Maintain the accuracy of the daily cash balance.
- Process returns and resolve product-related inquiries. Collaborate with the team to ensure efficient operational flow.

Camara Internacional de negocios

2024 - 2024

Sales advisor

- Identify customer needs and offer customized solutions that increase their satisfaction.
- Meet and exceed monthly sales goals, achieving a 20% increase in sales.
- Stay current with products and services to provide advice.
- Manage customer relationships, ensuring customer loyalty and generating opportunities.

COURSES AND LEARNING

Appointment Maker Certification

Mastery of strategies for efficient appointment and meeting management.
Development of communication, negotiation, and organizational skills.

Web development course

Technologies: HTML, CSS, JavaScript, WordPress, React, and Python.

Practical experience in responsive design, front-end and back-end development, and its application in personal projects.

Data Analysis Course

In this course, I acquired the skills and professional use of key tools for this field—Python (pandas, numpy), SQL, Power BI, Tableau, Jupyter, advanced Excel (Power Query), cleansing and ETL techniques, and basic modeling with scikit-learn—applying them to cleanse and transform data, create efficient queries, design interactive dashboards, build simple predictive models, and, above all, communicate actionable insights to stakeholders to support decision-making.

PROJECTS

Project 1 — Sales Analysis and Customer Segmentation (Jan 2022 — Mar 2022)

- Tools: Python (pandas, matplotlib), SQL, Power BI, Git.
- Description: Exploratory analysis and segmentation of the customer base to identify purchasing patterns and behavior by cohort.
- Tasks performed: Cleansed and merged transaction data, calculated RFM metrics (recency, frequency, value), created Power BI dashboards.
- Results: Identification of three priority segments accounting for ~60% of order value; proposal of targeted campaigns for the top 20% of customers.

Project 2 — Inventory Optimization Using Time Series (Apr 2023 — Jun 2023)

- Tools: Python (pandas, statsmodels, scikit-learn), Excel, SQL.
- Description: Historical demand modeling to propose optimal stock levels and reduce stockouts.
- Tasks performed: Daily sales aggregation, trend and seasonality modeling, replenishment rules, and control dashboard.
- Results: Identification of 15 SKUs with the highest risk of stockouts; reorder proposal that reduces the estimated probability of stockouts after implementation.
